ICON™ | Hinged Door Lock

Hinged Door Lock

Key Features

- A clean, compact lever handle with four point locking as standard. The grip has a gently radiused front face and a curved back for a comfortable hand hold. Used in conjunction with lever compression locking, a lifting movement of the handle activates locking rods at the top and bottom of the door.
- Available in 316-grade stainless steel only.

ICON™ multi-point locking can be achieved. Lifting the lever handle throws shoot bolts into head and sill. ThermalHEART™ doors illustrated have moulded nylon end cap/bolt guides.

On pairs of doors we have a dummy lock with ICON™ furniture for the keeper stile. ThermalHEART™ commercial doors illustrated.

Shoot bolts on non-thermal commercial doors fitted with multi-point ICON™ locks shown.

ICON™ lever furniture is designed to suit Elevate™ hinged and bi-fold doors. We offer three custom furniture sets ICON™, MIRO™ and ANDO™, all distinctly different.
