EXPERIENCE THE THRILL OF WIDE, OPEN SPACES.

A beautiful, flush threshold means less risk of tripping, easy accessibility and, best of all, an uninterrupted transition between you and the great outdoors. But achieving a flush sill and ensuring water tightness can be tricky! The ingenious FlowTHRU™ from AWS is the answer.

BENEFITS AT A GLANCE...

Fantastic for homes and commercial buildings alike, the AWS FlowTHRU™ is compatible with the full range of Vantage® and Elevate™ sliding and bi-fold doors. Just look at some of the many advantages.

- » The only fully tested threshold drain and door system on the Australian market.
- » Allows you to have a flush sill while protecting your floor and carpet.
- » Manufactured from 316-grade stainless steel. It's built to last!
- » Proven performance in the harshest of environments, up to a Category 4 cyclone.

- » Compliant with Australian and International standards for pedestrian, wheelchair, bicycle and cane use.
- » Maximum slot width of 6mm to prevent heels from becoming trapped.
- » Reduces the risk of slips.
- » Comes with detailed installation instructions, including slab set-down details.
