

FLOWTHRU PRO™

NEXT GENERATION INTEGRATED ALUMINIUM THRESHOLD DRAIN

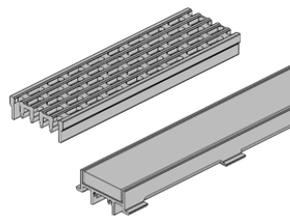

KEY FEATURES

- FlowTHRU Pro™ delivers a single-level set down, flush threshold drainage solution for a selection of Vantage® and Elevate™ Sliding Door Systems.
- Single level set down reduces installation time and does not compromise the slab.
- A flush sill threshold ensures both internal and external floor surfaces align seamlessly without any raised thresholds, preventing trip hazards or interruptions in the space.
- Choose from three grate options to best suit your project. aluminium, stainless steel or a custom tile insert to compliment existing flooring.
- The stainless steel grate option features an anti-slip surface, complying with AS 4586 for slip resistance.
- Colour match your project - the aluminium grate is available in a variety of powder coat colours as well as clear anodised.
- Ideal for multi-storey or suspended slab residential projects where a shallow rebate is required.

Single-level set down allows outstanding drainage and fast, easy installation.

3 grate options

- Stainless steel
- Aluminium (powdercoat or anodise)
- Tile insert

FlowTHRU Pro™ drain system is fully tested for use with select Vantage® and Elevate™ doors.

The stainless steel grate features an anti-slip surface, complies with AS 4586 for slip resistance.
