

PADDISON HOUSE

■ IT'S TIME TO COME IN
FROM THE COLD.

Featuring a luxurious bar, parents' retreat, alfresco dining area, and gorgeous exterior landscaping, the plans for Paddison House in Orange, NSW, ticked every box when it came to entertaining and comfortable living. The only thing left to tackle was the area's notoriously cold winters.

To attract as much warm sunshine into the home as possible, builder/owner, Michael Paddison, oriented most of the house to the north and made windows a key focus of his design.

During the initial planning stages, Michael consulted the team at Taberners Windows, part of the AWS fabricator network, and says he was "absolutely blown away" with the service he received. "This is the first time we've used AWS [products]. The thing I like about it is the finished quality product. Everything just works easy for us!"

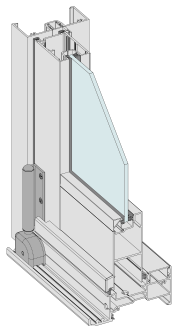

The home features a long, main corridor which might have appeared dark and unwelcoming were it not for the use of a series of large windows and doors that look out over a beautifully landscaped garden. "It's an amazing thing to be in because it gets so much natural lighting," says Michael.

Michael also loves the wow factor of the home's main, interior statement piece; a stunning raised roof section in one of the central living areas. The drawback was that it created a hot-air pocket that threatened the home's energy efficiency during the height of the summer months. The solution? Automatic opening windows that, when open, release the hot-air pocket and reduce interior temperatures without the need for constant (and expensive) air conditioning.

■ SERIES 410 FOLDMASTER™ BI-FOLD DOOR (BOTTOM ROLLING)

- × When you want to make a statement, these doors deliver strength, style, performance and versatility for a seamless connection to the outdoors.
- × The hallmarks of this beautiful bi-fold door are its incredible strength and ability to accommodate panels up to 3000mm high for simply breathtaking views.
- × Designed to accept the heavy-duty AWS Series 50, 51 and 52 doors, these bi-folds close perfectly flush for stunning aesthetics and superior weather protection.
- × These doors are successfully tested for water resistance to 450Pa making them perfect for all Australian weather conditions.
- × A variety of lever and lock options are available including multi-point and lever compression locking for added security.
- × Compatible with the AWS exclusive, retractable Centor Eco Screen, developed to keep out the creepy-crawlies or discreetly retract into the frame when not in use.

TABERNERS
WINDOWS & DOORS Since 1927

At Taberner's we pride ourselves on supplying high quality, energy efficient aluminium windows and doors as well as a vast range of glazing options and as an Australian Window Association (AWA) member we are bound by rules and regulations that ensure all of our windows and doors meet strict Australian standards. This allows you, the customer, peace of mind that all of our windows and doors will withstand our tough Australian climate. Along with a high commitment to customer service we take real pride in delivering you the best products possible to suit your needs.

2D & 3D CAD Files Available | Download from specifyaws.com.au to use in your projects.
